

# ShapeSonic: Sonifying Fingertip Interactions for Non-Visual Virtual Shape Perception

**Jialin Huang**      George Mason University  
**Rana Hanocka**     University of Chicago  
**Alexa Siu**         Adobe Research  
**Yotam Gingold**    George Mason University

# How can we create a non-visual interface for shape perception?

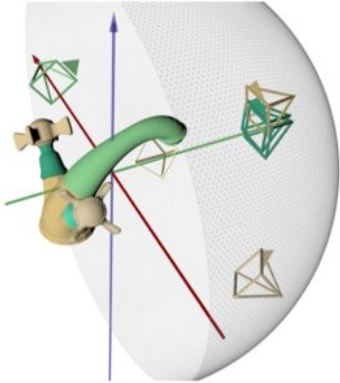

# Tactile Approaches

(a)

(b)

(c)

(d)

(e)

[Panotopoulou et al. 2020]

## CODE

```
1 // Begin File
2 height = 160; diameter = 120;
3 scale([0.5,0.5,0.5]) {
4 union() {
5 difference(){
6 cylinder(height,diameter/2,diameter/2);
7 translate([0,0,5])
8 cylinder(height,diameter/2-20,diameter/2
9 }
10 translate([120/2-5,10,80]) {
11 rotate([90,0,0]) {
12 translate([10,0,0]){
13 difference(){
14 scale([1,1.5,1])
15 cylinder(20,50,50);
16 translate([-5,0,-5])
17 scale([1,1.5,1])
18 cylinder(30,45,45);
19 translate([-30,0,-5])
20 }
```

## RENDER & PREVIEW

## 3D PRINT

[Siu et al. 2019]

# ShapeSonic is a sonification-based approach for perceiving shapes

# ShapeSonic is a sonification-based approach for perceiving shapes

# Sonification is mapping information to sound

CocaCola = Piano  
Verizon = Marimba

\*Stock price is still indicated by pitch.

# Experiment Setup

Tutorial shapes

# Experiment Setup

- 15 sighted and 6 BVI testers

Tutorial shapes

# Experiment Setup

- 15 sighted and 6 BVI testers
- Two rounds:
  - Pilot Study
  - Formal Study

Tutorial shapes

# Experiment Setup

- 15 sighted and 6 BVI testers
- Two rounds:
  - Pilot Study
  - Formal Study
- Two shape perception tasks
  - Shape Recognition
  - Landmark localization

# Shape Recognition

# Shape Recognition

- Identify one of three shapes

# Shape Recognition

- Identify one of three shapes
- ShapeSonic users: 82% success  
(vs. 33% chance)

# Shape Recognition

- Identify one of three shapes
- ShapeSonic users: 82% success (vs. 33% chance)
- Sighted and BVI users had similar performance (81% vs. 83%)

# Landmark Localization

# Observations

Please place the experience on a continuum between someone describing a shape verbally and feeling a shape physically

Please rate the degree to which you perceived the sensation of 3D shapes

# Observations

- Perceived as halfway between verbal description and feeling a physical shape.

# Observations

- Perceived as halfway between verbal description and feeling a physical shape.
- Haven't reached the skill ceiling.

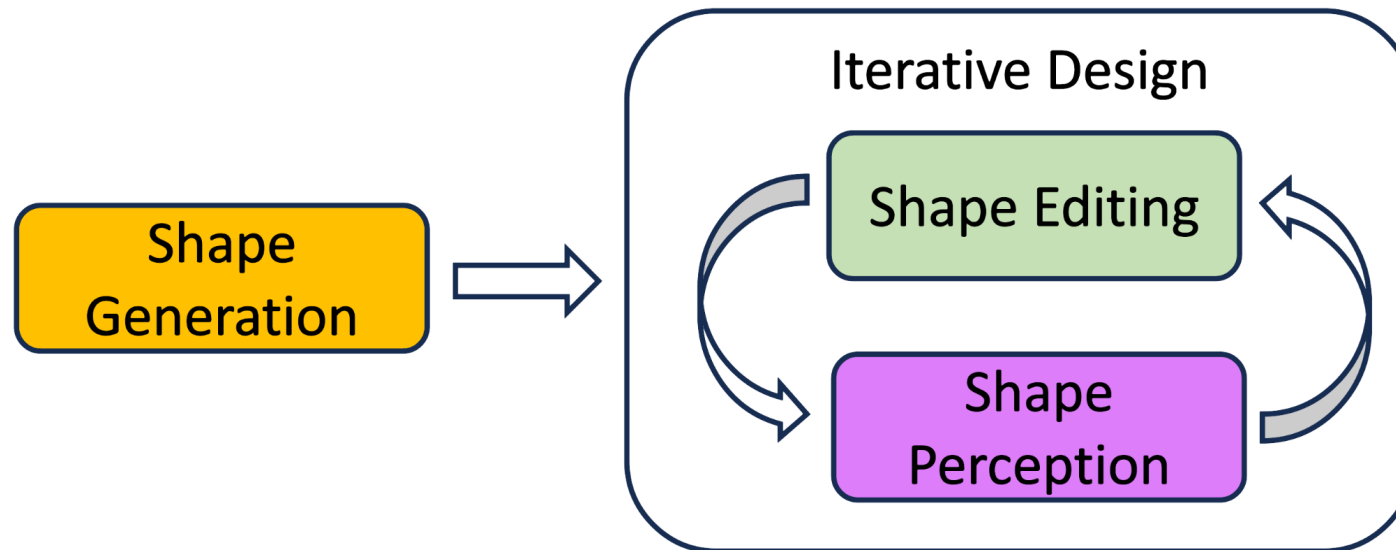

# Observations

- Perceived as halfway between verbal description and feeling a physical shape.
- Haven't reached the skill ceiling.
- Hand tracking latency is an impediment.

# Future Work

- Sonify physical attributes
- Complex objects and scenarios
- Non-visual 3D shape design
